Fisheries Certificate Schedule

Bering Sea Aleutian Islands Alaska Pollock Fishery

Client/Certificate Holders:

At-Sea Processors Association

Management System: Alaska pollock are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, MSA), with management recommendations from the North Pacific Fishery Management Council (NPFMC) and implementation through the National Marine Fisheries Service (NMFS). Under the MSA, the NMFS must manage fisheries to maintain optimum yield (OY) by rebuilding overfished fisheries and preventing overfishing.

Chain of Custody: Bering Sea Aleutian Islands pollock are processed and frozen at-sea as headed and gutted, frozen fillet blocks and individually frozen fillets; and are landed onshore for processing. Chain of custody for at-sea processors starts on board at delivery to the factory. Chain of custody for unprocessed onshore landings starts upon landing to a processing facility.
